

fabric Longlife

Fabric S43

These materials are elegant chenille fabrics.

Product width: approx. 140 cm

Abrasion cycles: as per RAL 430/4 for working on upholstered furniture

Composition: NS: 100% polyester
GS: 100% polyester

Scrub resistance: ★★★

Rub fastness (colour wear): ★★★

Light fastness: ★★★

Pilling behaviour: ★★

Right reserved to make structural and colour changes!

Care and cleaning: with commercially available products

Characteristics typical of the product:

- Nap changes (seat shine/shiny areas) are unavoidable with all chenille fabric.
- The chenille effect will become somewhat flatter over time.
- Pilling is unavoidable and can be caused by the adherence of clothing and other textile fibres.
- Every flat woven fabric will become roughened during use.
- Contrasting colours convey a sheen. The incidence of light will cause light and dark effects.
- Loops caused by catching on sharp objects or Velcro strip are to be expected.
- Streaks are a typical feature of the roughened surfaces.
- Caution: If the material is of a light colour, soiling and jeans rubbing will show up faster and more clearly than on dark colours.
- **Water should be dabbed off as water stains can remain easily visible.**

Caution: Discolouration caused by textiles are excluded from every manufacturer warranty.

This is not a fault in the material, but a defect in the clothing material. The complaint should be addressed to the clothing store where the article was purchased. The „polluter pays“ is the principle that applies here.

★★★ very good, ★★ good
