Pilling behaviour: good

Right reserved to make structural and colour changes!

Care and cleaning

For cleaning and care of your upholstered furniture please always use the high quality Longlife fabric / PURATEX® Care set only, which was especially developed for this fabric. At the same time, LCK offers the opportunity to register for a 5 year service warranty. This warranty comprises professional advice by phone, carriage-free delivery of special products for free (stain-remover) as well as a one time cleaning service free of charge for the dirty spot by an expert at your home. Please see www.blacklabel-moebelpflege.de for further information.

Please note:

- Nap changes (seat shine / shiny areas) are unavoidable with all velours fabric.
- Light patches occur on regularly used areas.
- Contrasting colours convey a sheen. The incidence of light will cause light and dark effects.
- When in use patina and shiny patches must be expected.
- Streaks are a typical feature of the roughened surfaces.
- The weave produces light and dark variations/incidence of light or raster variants.
- **Caution:** If the material is of a light colour, soiling and jeans rubbing will show up faster and more clearly than on dark colours.
- Water should be dabbed off as water stains can remain easily visible.

Caution: Discolouration caused by textiles are excluded from every manufacturer warranty.
